

VeriShield™ Smart Hearing Solution

Noise-Induced Hearing Loss Prevention and Protection

Occupational noise-induced hearing loss (NIHL) has long been a serious risk for workers and a major challenge for safety professionals. To improve safety metrics, understanding the importance of NIHL is greater than ever, as is the awareness for protection to be personalized if it is to be truly effective. Unlike most other occupational health and safety injuries, NIHL is pain-free, invisible, usually gradual, and therefore often goes unnoticed until the damage is done. However, many public institutions recognize it as the most prevalent occupational disease in the world. The good news is, NIHL is also easily preventable.

Hearing Loss Statistics

- About 25% of all workers have been exposed to hazardous noise, with 14% exposed in the last year
- 34% of Noise-Exposed workers report not wearing hearing protection
- Approximately 12% of all workers have difficulty hearing
- About 8% of workers have tinnitus
- About 16% of noise exposed texted workers have hearing loss that impacts day-to-day activities
- 13% of noise-exposed tested workers have hearing impairment in both ears

5 Ways to Minimize Work Place Hearing Loss

1. Noise Exposure Monitoring
2. Engineering and Administrative Controls
3. Audiometric Evaluation
4. Hearing Protection Devices

VeriShield™ Smart Hearing Solution

Honeywell has introduced a new smart hearing solution that combines cloud-based software and connected, protective headsets to monitor sound in real time and analyze patterns to help companies better protect workers from noise-induced hearing loss.

There are three complementary components which make up the VSHS solution:

#1

Hearing Protection Headset

Provides hearing protection and collects noise exposure data. Noise exposure data is individual, and both environmental as well as under the hearing protector.

#2

Mobile App

Displays noise exposure data for workers and supervisors, and sends data to the cloud.

#3

Web Portal

Analyzes, stores, and presents the data in a user-friendly interface, and provides actionable insights for safety professionals.

Contact your SSI Representative for more information on the Honeywell VeriShield™ Smart Hearing Solution!
