Design

Unmistakable

The unmistakable V-Gard “V” has a very important role in its performance.

The iconic “V” gives the hard hat a unique profile which enables it to deflect objects and provide added protection in the event of impact, as it increases the distance between the contact object and the head of

Complete Solution

Guaranteed Flexibility

Years of research and development have given V-Gard the very best in product engineering.

As a world leader in head protection, MSA develops accessories all over the world for the widest range of industrial applications. That’s how V-Gard has become a safety platform to which a variety of accessories needed for total head protection can be attached.

Quality

100% Lot Tested

The quality and high performance of the V-Gard are 100% lot tested to ensure they meet MSA’s™, and more importantly your, quality standards.

Produced in 100% virgin high-density polyethylene, V-Gard is guaranteed to have the rigidity and elasticity needed to absorb impact, successfully meeting all the requirements of ANSI Z89.1 and CSA Z94.1. As well as high performance, the quality of its raw materials grants the shell a service life of up to five years.

Class E

Approved for electrical through ANSI Z89.1 & CSA Z94.1
