

Do you know how to identify a NIOSH-approved Respirator?

NIOSH-approved respirators have an approval label on or within the packaging of the respirator (i.e. on the box itself and/or within the users’ instructions). Additionally, an abbreviated approval is on the FFR itself. You can verify the approval number on the **NIOSH Certified Equipment List (CEL)** or the **NIOSH Trusted-Source** page to determine if the respirator has been approved by NIOSH. NIOSH-approved FFRs will always have one the following designations: N95, N99, N100, R95, R99, R100, P95, P99, P100.

Example of Exterior Markings on a NIOSH-approved Filtering Facepiece Respirator

Signs that a respirator may be counterfeit

IN STOCK NOW!
