MELTBLOWN TECHNOLOGIES

Leaky Electrical Transformers an Issue?

Safely contain a leaking transformer with our Transformer Bag Spill Kit. Our self-supporting **Transformer Bag Spill Kit** allows you to move a transformer without having to empty it first, while helping you comply with SPCC regs. Each kit contains (2) Meltblown Polypropylene Pads to cushion the bag to prevent damage on rough surfaces, and they absorb any leaked dielectric fluid. Transformer spill containment and transfer is easier than ever!

Transformer Bag Spill

- Multiple layers and cord reinforcement resist punctures and tears.
- UV stabilization protects the material from degradation during extended exposure to sunlight
- Cold-crack resistance eliminates failures in extremely cold temperatures.
- Flexibility and light weight allow for easy handling and quick installation.
- Meltblown polypropylene pads are included in each kit to absorb any leaked dielectric fluid.
