

3M™ SecureFit™ H-Series Hard Hats

With Pressure Diffusion Technology

3M™ SecureFit™ H-Series Hard Hats provides 3M innovation in comfort while maintaining the traditional cap and full brim design that many prefer. If you wear a hard hat for a full shift, you want it to be comfortable and fit properly.

The new 3M™ SecureFit™ H-Series Hard Hat features Pressure Diffusion Technology, meaning the headband incorporates self-adjusting front paddles along your forehead. The headband is designed to self-adjust to the wearer as the ratchet is tightened. This helps create a personalized fit and reduces the pressure on the forehead up to 30% compared to previous 3M H-series hard hat suspensions.
