Ansell

Why Ansell? We are innovators striving to create advance solutions and technology that will solve the problems of workers, creating a safer and more protected world. Our vision is of a world where people enjoy optimal protection against the risks they are exposed to. Whether at work or outside the workplace, people require the right protection for the situation. After all, what better guarantee is there of increased safety, security and productivity than adequate protection?

ALPHATEC® 58-435

The new AlphaTec® 58-435 glove style combines the market-leading performance of Ansell Grip Technology™ with the flexibility and dexterity of an unsupported nitrile shell. This unique, patented design features a premium grade nitrile compound coating for versatile chemical protection and long-lasting snag, puncture and abrasion resistance along with a comfortable cotton-flocked lining.

HYFLEX® 11-541: EXCEPTIONAL CUT PROTECTION IN AN ULTRALIGHT WEIGHT GLOVE.

The HyFlex 11-541 is engineered to provide comfort with its thin, snug liner; protection against cuts with new Intercept Cut Resistance Technology®; added abrasion resistance for durability, and grip for reduced hand fatigue, ensuring workers are protected and comfortable throughout their work day.

INTERCEPT Technology® blends engineered synthetic and natural fibers into high-performance yarns that provide high cut protection along with great comfort and dexterity.

Ringers Gloves® R-355

The Ringers 355 Rope Rescue Glove includes a synthetic leather palm with a foam padded rope channel and reflective markings for search and rescue. Developed with Ringers' F3 Technology™ for superior dexterity and comfort includes palm Kevlar stitching, cut protection, and secure cuff. The added features like leather between fingers for durability and fingertip dexterity for knot untying.
