Don't Be Intimidated By Moisture Analysis!

Let the OHAUS MB120 do all the work!

Having trouble designing a test method? The MB120 moisture analyzer is designed with SmartGuide™, a program that makes it simple to test a material and allow the user to save the program parameters determined by the instrument. Instead of several “trial and error” tests as with other brands of moisture analyzers, the MB120 with SmartGuide determines the program for you in a single test.

The OHAUS MB120 can be found in just about any industrial application imaginable...

- Food and Beverage
- Cosmetics
- Agriculture Products
- Personal Care Products
- Pharmaceuticals
- Wastewater Treatment
- Botanicals (seed-to-sale products)
- Electronic Materials
- Engineered Materials
- Countless other applications!
