JF1625-OR

JF1625-TG

Flame-Resistant Cotton (9 oz. or 12 oz.) is recommended for light to moderate welding applications, including most MIG and TIG welding applications. For welding uses that involve more intense sparks and heat generation (flux core, stick welding, etc.), leather is the recommended protective material. Flame-resistant garments may not perform properly if soiled or tattered. Keep properly cleaned to maintain flame-resistant properties. Follow care labels attached to garment.

7 oz. AR/FR Cotton Coveralls

- Lightweight 7 oz. flame-resistant treated cotton
- Elastic waistband
- Left chest pocket with pencil slot
- Hip pockets & pass-through pockets
- 2-way FR zipper with protective flap
- UL classified; NFPA 2112 certified
- NFPA 70E certified; ATPV 8.7 cal/cm² (PPE Cat 2)
- Meets OSHA 1910.269 and 1910.132
- 30.5" inseam for all sizes

Large	23" - 25.5"	7 3/8 - 8

Stretch design accommodates all head shapes (3 sizes available)

Deep crown allows cap to be worn just above eyebrows and over top of ears

Non-slip silicone grip strip at forehead

Chafe-free FR ear coverage

Bill pocket stores extension flap when not in use

Extension flap inside bill

BSX® Silicone Grip FR Cotton Welding Cap

Constructed of lightweight 7 oz. flame-resistant cotton to provide protection from sparks, with less heat trapping. The FR cotton stretch knit panels provide protection with flexibility for added comfort. The larger cap bill offers extra protection from sparks and UV rays and includes a hidden flap that can be extended as needed for even more neck protection. Unique silicone grip strip on the forehead provides a more secure fit, with less slipping and sliding.

AH1631-NB	S-L	Navy/Black

AccuFlex™ A6 Cut & Impact-Resistant Nitrile-Coated Knit Glove

Constructed of an HPPE knit blend to deliver outstanding cut resistance. Strong nylon threads are wrapped around a core of fiberglass fibers. The nylon threads are then wrapped in a layer of stainless steel strands, which are covered by another layer of high-strength synthetic yarn to maximize protection. To improve comfort, an additional layer of nylon covers the inside of the gloves.
